

Your games, your story.

Find your next game. Track what you play. See what your friends are playing.

About Playthroughs

Playthroughs is a home for your life in games. Keep track of what you're playing, what you want to play and what you've already played, and follow friends to see what they're enjoying and find your next game.

Mark a game played and rate it in a tap, or keep a journal of every session. Ports, remasters and editions sit together under one game, so you can record the version and platform you actually played.

Track what you play. Start a playthrough, update it as you go and finish it as played, completed or dropped.

Out of ten. Rate any game on a ten-point scale, with or without a review.

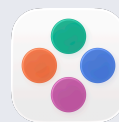

See what your friends are playing. Keep up with their activity on Home, and like and comment on their playthroughs, reviews and lists.

Keep a journal. Dated sessions, notes and playtime, then a recap when you finish.

Plan what's next. Save games to Want to Play and line them up in Play Next.

Lists and collections. Ranked lists to share, and your physical and digital copies catalogued by platform.

Bring your history. Add games you've played in quick batches, or import your Steam library.

Name
Playthroughs

What it is
A game tracker and social diary

Platforms
iOS and Android, with a web app on the way

Status
Public beta: iOS through TestFlight, Android as an APK download

Website
playthroughs.app
